PROFESSIONAL SUMMARY

Product Owner and Senior Business Systems Analyst with extensive experience delivering enterprise B2B digital products by connecting business strategy with software engineering.

Strong background in Product Ownership, Business Analysis, Requirements Engineering, Enterprise Systems and Digital Transformation, with hands-on experience throughout the complete product lifecycle—from Product Discovery and Backlog Management to User Acceptance Testing (UAT), software implementation and continuous product improvement.

Experienced in modernizing legacy applications, automating business processes and designing scalable enterprise solutions using Oracle Database, SQL, PL/SQL and Python.

Known for collaborating effectively with executives, business stakeholders, software vendors and cross-functional engineering teams to deliver secure, scalable and business-driven technology solutions.

CORE EXPERTISE

Product Ownership | Product Management | Business Systems Analysis | Business Analysis | Functional Analysis | Requirements Engineering | Product Discovery | Product Delivery | Product Backlog | Roadmap Planning | Stakeholder Management | User Stories | Acceptance Criteria | User Acceptance Testing (UAT) | Agile | Scrum | Kanban | ERP | CRM | Oracle Database | SQL | PL/SQL | Python | Streamlit | Flask | Pandas | REST APIs | System Integration | Cloud Computing | Business Process Improvement | Digital Transformation | BPMN | IT Governance | LGPD (Brazilian GDPR)

PROFESSIONAL EXPERIENCE

Product Owner

Ticket Gestão em Manutenção EZC S.A. (an Edenred company)

July 2026 – Present

- Lead the evolution of enterprise B2B fleet management products, acting as the primary connection between business stakeholders, customers and software engineering teams.
- Drive Product Discovery and Product Delivery initiatives by translating business needs into user stories, defining acceptance criteria and continuously prioritizing the Product Backlog.
- Collaborate with cross-functional Agile teams to ensure high-quality software delivery while supporting strategic business goals and customer success.
- Coordinate User Acceptance Testing (UAT), monitor product performance indicators and contribute to continuous product improvement through data-driven decision-making.

IT Systems Analyst

FUNCORSAN

August 2023 – July 2026

- Led the modernization of a legacy CNAB 400 banking processing system by redesigning the application from C# into a modern Python and Streamlit architecture.
- Redesigned financial data processing using secure in-memory operations, improving application performance, reducing operational risks and ensuring full compliance with LGPD (Brazilian GDPR) data protection requirements.
- Designed and implemented an automated corporate reporting platform using Oracle SQL, PL/SQL, Python and Pandas, replacing manual reporting processes and delivering strategic business intelligence to Pension and Actuarial departments.
- Developed advanced Oracle SQL and PL/SQL scripts supporting auditing, compliance, financial analysis and executive reporting.
- Participated in the planning and execution of enterprise database and application migration to a Private Cloud infrastructure, contributing to platform modernization, operational stability and business continuity.
- Worked closely with business users, software vendors and technical teams throughout requirements gathering, functional analysis, software validation and production support activities.

Infrastructure Solutions Consultant

Hardlink – (3MTECH Comércio e Serviços de Informática Ltda.)

November 2021 – November 2022

- Provided consultative support for enterprise customers by assessing infrastructure requirements and recommending technology solutions aligned with business objectives.
- Prepared technical proposals, collaborated with leading technology vendors and supported corporate digital transformation initiatives across multiple industries.

Systems Analyst

CIGAM Software Corporativo

September 2010 – August 2011

- Conducted business analysis and requirements gathering for enterprise ERP solutions.
- Translated complex business rules into functional specifications, supporting software implementation, functional validation and continuous product improvements.
- Collaborated with software development teams and business users to improve ERP functionality and customer experience.

Inside Sales Representative

Dell Technologies

October 2008 – September 2010

- Managed enterprise technology sales focused on corporate infrastructure solutions.
- Developed consultative relationships with business customers, identified technology challenges and proposed solutions aligned with digital modernization initiatives.
- Strengthened business communication, negotiation and stakeholder management skills while supporting complex B2B sales cycles.

TECHNICAL PROJECTS & PUBLICATIONS

- **SQL Without Fear: A Survival Guide for Your First IT Job (2026)** : Author of a practical technical book covering Oracle SQL, relational database modeling and real-world database development concepts for professionals beginning their careers in Information Technology.

- **Pecuária Insights ERP:** Designed and developed a modular full-stack ERP platform using Python and an offline-first architecture to support livestock management, financial control, auditing, reporting and business analytics.
- **Casa VIP ERP:** Designed and developed a full-stack ERP platform for interior design firms featuring CRM, RBAC security, financial management, inventory control and Kanban-based project management.

EDUCATION

- **Bachelor's Degree in Information Technology Management**
Universidade do Vale do Rio dos Sinos (UNISINOS) - University of Vale do Rio dos Sinos (UNISINOS)
- **Bachelor's Degree in Business Administration**
Centro Universitário da Grande Dourados (UNIGRAN) – Greater Dourados University Center, Brazil
